

Model: SXM-ANT-SPLIT (Two-Way SiriusXM Amplified Splitter)

The SXM-ANT-SPLIT amplified two-way splitter kit is designed to split the signal of any SiriusXM™ Radio antenna to two different SiriusXM™ Radio receivers. Included in the package is a gold SMB-jack to F–male adapter. To install the splitter first screw the gold SMB-jack to F–male adapter onto the input port of the splitter. Next, attach the F-male connectors to the output ports on the splitter and screw on the 2 FT cables to the F-male connectors. Next, connect the SMB end to the antenna port on each receiver. An optional inline amplifier (Model SBA-1) can be added for longer antenna cable runs.

Included in the Kit:

- (1) Amplified 2-Way Splitter
- (1) Gold SMB-jack to F–male Adapter
- (2) 2 Foot RG-6 Cable
- (2) F-male RG6 Connectors
- (2) Mounting Screws
