

Grinder Cradle Installation Instructions

for the DF64

CREMA
coffee products

IMPORTANT:

Disconnect your machine from its power source before moving forward with your installation.

Step 1 - Choosing Your Mounts

Your grinder cradle can be set at two different heights, based on the accessories you plan to use.

UPPER: If using the Crema Dosing Cup, or a Crema Portafilter *without* a Crema Dosing Funnel, mount the cradle to the *upper* mounting holes.

LOWER: If using the Crema Portafilter *with* a Crema Dosing Funnel, mount the cradle to the *lower* holes.

Note: The curved side of the base should face away from the cradle arms, as shown.

Step 2 - Remove Stock Cradle

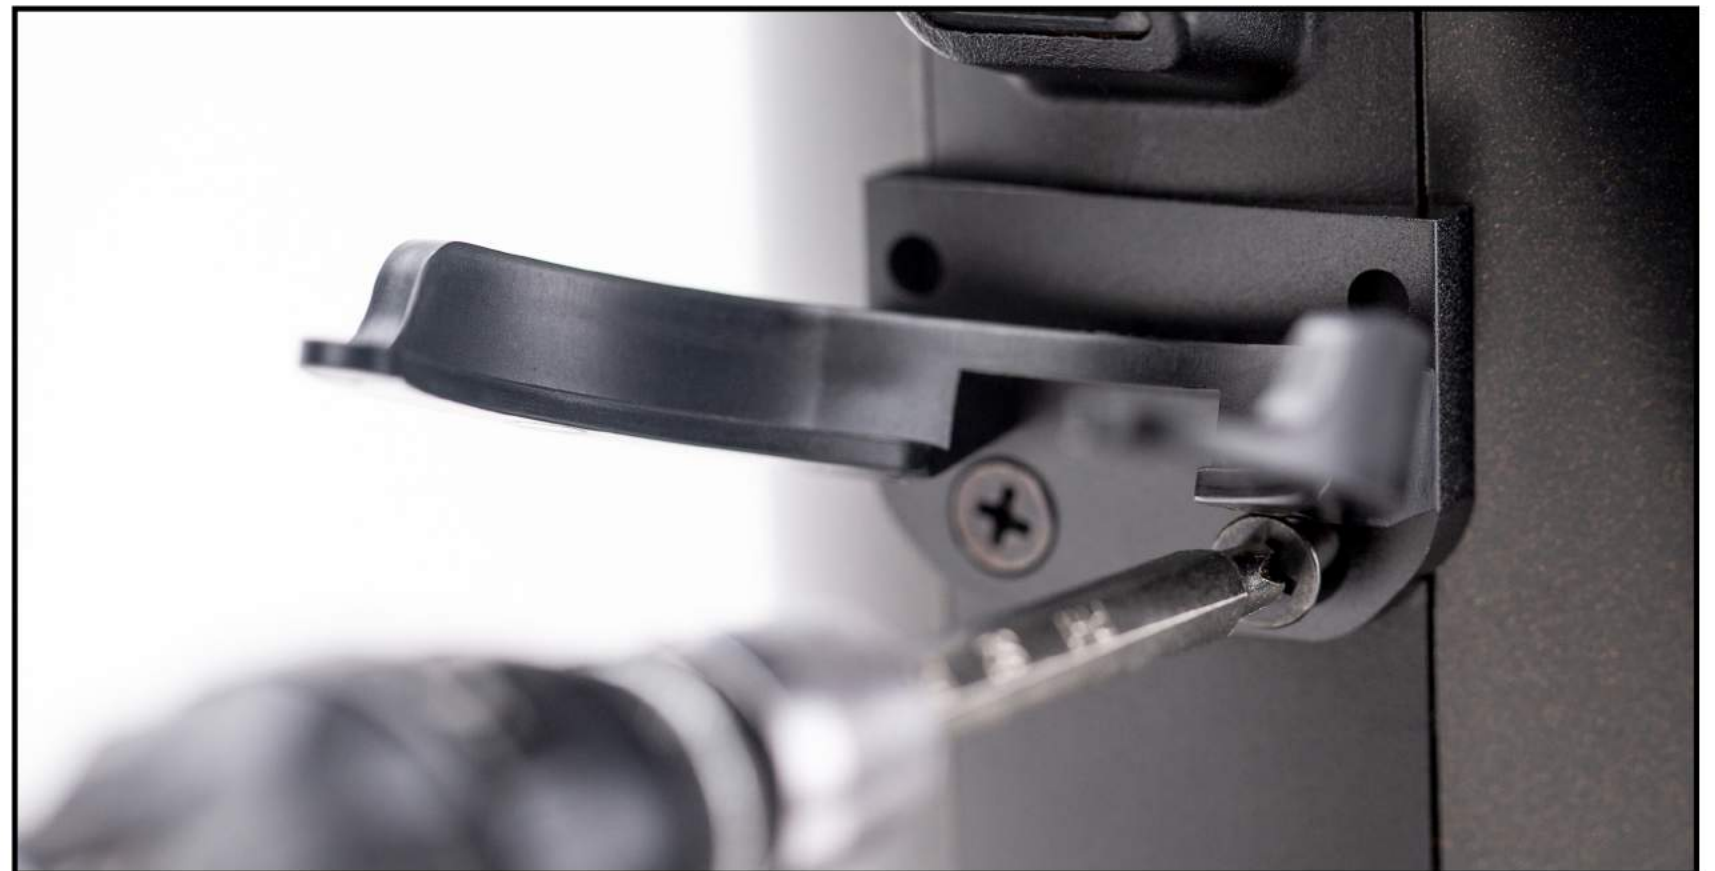

A: Remove the stock cradle by removing the philips head screw located in the center of the cradle.

B: Remove both philips head screws located on the body of the grinder, under the mounting location of the stock cradle.

Step 3 - Attaching the Crema Cradle

Using the screws provided (black), mount the Crema Cradle to the grinder, using the holes from the previous step (Step 2:B).

Thank you for choosing Crema!

Grind on!
