How to Use...

- If numbers are something your kids are just starting to learn I would start with a number matching activity.
- Perhaps just using numbers 1-5.
- You could even hide the numbers in a dry sensory base and when they find it they need to match it to the number.

1	2	3	4	5
6	7	8	9	10

1	2	3	4	5
6	7	8	9	10

- Match the number with the correct amount of dots.
- Use the blank table as a tens frame.
