

# How to make a Quill pen with a Feather

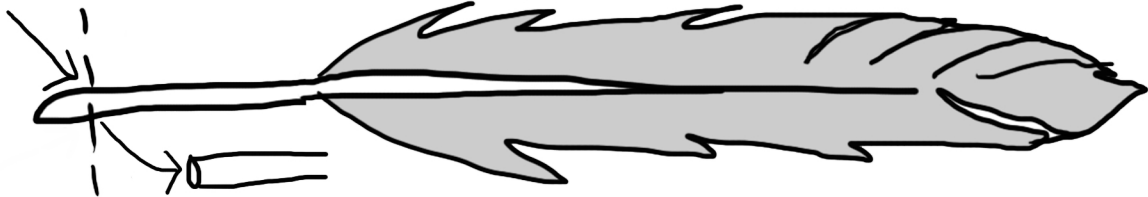

by Alice Draws The Line

You need -

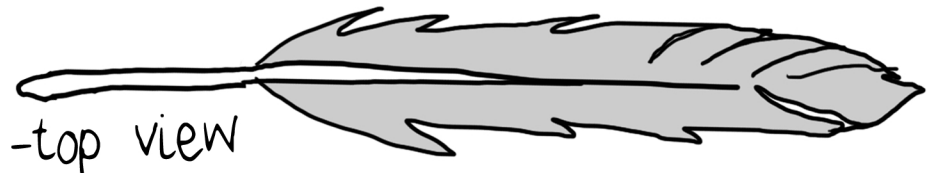

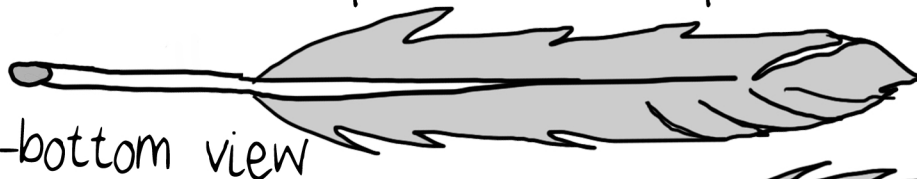

A Big Feather, A Cutting Mat, A Craft Knife, Ink and Paper.

Put the feather on the cutting mat and lean against the mat to make the cuts.

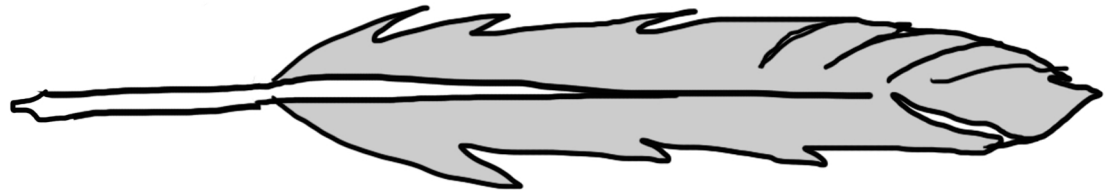

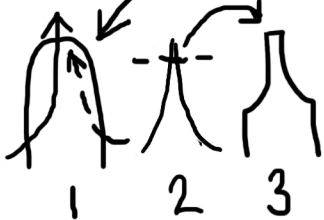

1. Cut the round end off

2. Cut the rough nib shape - a diagonal line from back to front

3. Shape the nib from the left and right, straighten the top too

4. On the inside of the nib, score (not cut) a line down the middle to help the ink flow to the tip

5. Find your ink and paper and give it a go!
