

# BACKPACKS

## 2110 SERIES

CODAN  
COMMUNICATIONS

Codan offers lightweight backpacks for our 2110 series Transceivers that are designed for durability, comfort, and easy portability. With ample storage in a compact design, these backpacks are suited for long missions and communications on the move.

### SOFTPACKS

The softpack is an ultra lightweight and compact backpack for the 2110 series Transceivers. Two 4 litre side pockets and one 3.5 litre bottom pocket ensures that the Transceiver and all accessories are contained in a neat and highly functional backpack, while still allowing room for personal items.

Consists of a comfortable harness with internal bracing, hip belt, and sternum strap.

**Material:** Cordura

**Standard colour:** Black

**Weight:** 1.23 kg (2.71 lbs)

### EXTERNAL FRAME

The external frame is a heavy duty backpack with adjustable semi-flexible contoured external frame as preferred by various professional and government organisations. Its modular design allows for additional loads of up to 50 kg to be attached.

Two 5 litre side pockets and one 3 litre bottom pocket for accessories and storage. Includes a front pocket to hold an A4 size folder and the Getting Started Guide.

Ergonomic shoulder harness with ventilation panel ensures maximum comfort even during long treks.

**Material:** 1000 Denier bulked filament nylon, and co-polymer frame

**Standard colours:** Black, US Woodland Camouflage, US Desert Camouflage, Olive/Tan

**Weight:** 4.3 kg (9.48 lbs)
