BREVETS EN COURS

(USE WAHL OIL ONLY.)

3 STEP SYSTEM

PERIODICALLY OIL  
HEEL OF BLADE

WIPE OFF EXCESS OIL so it does not run into the motor compartment. Oil in the motor compartment will eventually lead to poor motor performance.

**Blades should be oiled after using disinfectant  
or sanitizing solution.**

**UNIT CARE**

Use a clean cloth (dry or dampened with water). DO NOT USE bleach, benzene or thinner to clean the unit.

**CORD CARE**

The cord should never be used to pull the trimmer. Freedom of movement needs to be maintained. Care should be used to keep the cord untwisted, and undamaged. When stored, the cord should be coiled and placed neatly in a dry place.

**LED INDICATOR**

- **Solid:** LED will be fully lit in use or when the battery has reached full charge.
- **Flashing:** The battery has approximately 20% charge remaining.
- **Pulse:** While charging, the LED will pulse until battery is fully charged. The LED will change to solid when the battery has a full charge.

OFF

ON

**QUICK CHARGE**

- **For a one minute charge:** Average use is 4 minute run time.
- **For a five minute charge:** Average use is 14 minute run time.

**TRIMMER CARE  
BLADE CARE & OILING**

In order to ensure that you get the most life and performance out of the trimmer, we recommend oiling daily. To oil it properly, the trimmer should be held so the blades are in a downward position as shown. Place one drop of Wahl oil in the center of the movable top blade and one drop of oil on each end of the top blade. Turn trimmer on and run to distribute the oil. When oil is evenly distributed, turn trimmer off and wipe off excess oil with a soft cloth.

Periodically oil heel of blade (shown in image) to reduce blade friction.

**LITHIUM-ION BATTERY REPLACEMENT,  
TRIMMER DISPOSAL AND RECYCLING**

This trimmer uses a lithium-ion battery. For battery replacement send the entire, intact trimmer unit to: Wahl Annex 3001 North Locust P.O. Box 578 Sterling, IL 61081. Do not attempt to remove the battery. Lithium-Ion batteries can explode, catch fire, and/or cause burns if disassembled, damaged, or exposed to water or high temperatures.

If you choose not to send the appliance in for battery replacement, the entire intact trimmer must be disposed.

Do not attempt to remove the battery for disposal. Lithium-Ion batteries may be subject to local disposal regulations. Many locations prohibit disposal in standard waste receptacles. Check your local laws and regulations.

For recycling contact a government recycling agency, waste disposal service, retailer, or visit online recycling sources, such as www.batteryrecycling.com or www.rbrcc.org.

**TROUBLESHOOTING**

If your rechargeable trimmer does not seem to be operating or charging properly, please check the following:

- Check the outlet's current by plugging another appliance (one you know is in proper working condition) into the outlet.
- Make sure the unit is not connected to a power source that turns itself off when lights are turned off.
- Verify that the blade assembly moves freely and is mounted properly.

If you still encounter problems with your unit, ship your trimmer, stand and its recharging cord, prepaid, to our factory with a note explaining the problem. Please mail your product prepaid to: Wahl Clipper Corporation Attention: Repair Department 3001 N. Locust St., P.O. Box 578, Sterling, Illinois 61081.
