

**ORGANIC**BIOSCIENCES

For Root Development, Thick Stalks & Vibrant Green Canopies

## DIRECTIONS

- 1. Shake well before each use.
- 2. Feed every time you water your plants and use reverse osmosis / deionized water if possible.
- Adjust the pH of each feed to 6.2 6.4 if necessary, using FOOP pH Up / FOOP pH Down. Using pH levels outside of this range risks harming plants!
- 4. For best results, follow the recommendations in the following table:

Veg Stage	Veg 1	Veg 2	Sweetener
Week 1	20 ml/gallon	20 ml/gallon	5 ml/gallon
Week 2	30 ml/gallon	30 ml/gallon	10 ml/gallon
Week 3	40 ml/gallon	40 ml/gallon	15 ml/gallon
Week 4	50 ml/gallon	50 ml/gallon	15 ml/gallon
Week 5	60 ml/gallon	60 ml/gallon	20 ml/gallon
Week 6+	60 ml/gallon	60 ml/gallon	20 ml/gallon

For 3-week veg cycles, stop after week 3. For 4-week veg cycles, stop after week 4.

## **GUARANTEED ANALYSIS**

GUARANTEED ANALI 313			
TOTAL NITROGEN (N)			
0.05% Water Soluble Nitrogen			
0.09% Water Insoluble Nitrogen			
AVAILABLE PHOSPHATE (P,Os)			
SOLUBLE POTASH (K,O)			

Derived from: fish excrement, kelp extract (Ascophyllum nodosum), volcanic ash

## CONTAINS NONPLANT FOOD INGREDIENTS Active Ingredients:

1.15% Humic acids derived from Leonardite 98% Inert ingredients (as nonplant food)

**FOOP Nutes** is a line of plant nutrients created from organically-sourced input materials, including reclaimed fish excrement in mineralized aquaculture water, designed for both conventional and hydroponic farming.

## IMPORTANT TIPS

Store in a cool, dark place. To avoid spoilage, do not allow any other FOOP product to get into this container.
