## HAND TUFTED RUG

### CARE & CLEANING

- Do not pull loose or protruding ends; neatly clip with a pair of scissors.
- Remove spills immediately. If liquid, blot with a clean undyed cloth by pressing firmly around the spill to absorb as much as possible, and the rug should be dried on both front & back sides. Do not soak or wash the rug in any liquid.
- Avoid use of harsh chemicals for removal of stains.
- Hand brush or light vacuum regularly. Occasional professional cleaning is recommended. Do not dry clean.
- Rotate or reposition the rug every three or six months to enable even wear & tear.
- To store, roll the rug with front side in.
