

# INSTALLATION INSTRUCTIONS

## 150 Series Mounting Instructions

**FITMENT:**  
MWL-155 AND MWL-156S

### **MOUNTING PROCEDURE:**

For ease of mounting your quick release bar, please follow these easy steps!

1. Align front clip in bushing flanges and push forward. You may need to pull the sides of the backrest slightly outward to fit snugly.

2. Rotate backrest bar back until rear latches touch rear bushings.

3. With thumbs on the base of bar, use index fingers to lift latch pads slightly, and let bar rotate rearward to seat latches in rear bushings.

4. Now push on the pad backward toward the end of the fender to allow latches to rotate into locked position.

5. With thumbs, push down on latch pads to check full engagement of latches

You can also go to our website, search for "MWL-156S", click on the product and watch the YouTube video for instructions on how to mount your quick-release rack/bar.
