

# PRODUCT SPECIFICATION REPORT

A low VOC industrial lubricant, penetrant and corrosion inhibitor, that loosens nuts, bolts, fittings, while displacing moisture, removing rust and preserving metal. Meets CARB VOC regulations.

## PRESERVE LV

PROD. #3226

Moisture Displacer and Corrosion Inhibitor

### FEATURES/BENEFITS:

Excellent Penetrant	Quickly penetrates rust and corrosion to loosen frozen nuts, bolts, and screws
Excellent Lubricant	Light Duty Lubricant for gears, chains, slides, and other moving parts
Displaces Moisture	Dries electrical components such as automotive distributors, wiring, motors, etc.
Contains a blend of Silicone and Oil	Provides light duty corrosion protection to both ferrous and non-ferrous metals by sealing out moisture and air

### APPLICATIONS:

Protecting all appliances, sewing machines, lock mechanisms, business machines, motor shafts, guns, fishing reels, golf clubs and toys

### DIRECTIONS:

It can be applied by spraying, wiping, or dipping. A liberal coat of Zepreserve LV should be applied by one of the above methods and allowed to dry. Loosening and penetration will occur within minutes. On deep corrosion, the application should be repeated.

### SPECIFICATIONS:

Physical Form	Liquid
Color	Amber
Odor	Characteristic
Specific Gravity	0.87
Shelf Life	3 Years
Flash Point	>93.3°C

### PACKAGING:

- 322624 (4 X 1 GAL)
- 322635 (1 X 5 GAL)
- 322685 (1 X 55 GAL)
