

PRODUCT SPECIFICATION REPORT

No. 1 prevents asphalt from sticking to surfaces. No. 1 can be use with polymer modified SMA designs, crumb rubber designs, warm mix designs, most PG mix designs and conventional designs.

NO. 1 ASPHALT RELEASE AGENT

Asphalt Release Agent

PROD. #4336

FEATURES/BENEFITS:

Excellent Release Properties	Can be used with virtually all mix-designs.
Concentrated	For best results, use with a 15:1 dilution ratio for conventional mixes and as a straight ready-to-use for sticky mixes.
Safe	Water-based inert chemistry will not harm asphalt, trucks or equipment. It will not strip hot asphalt or affect the paved mat.
DOT Approved	Please check local State DOT guidelines & approval list.

APPLICATIONS:

Can be used on transportation vehicles such as dump trucks, dump trailers, flow-boys, live bottom trailers, & hopper trailers.
Can be used on paving equipment such as asphalt pavers, rubber-tired rollers, material transfer vehicles (MTVs), & windrow elevators.
