

# PRODUCT SPECIFICATIONS REPORT

Use Zep Penetrating Lubricant Spray to prevent corrosion and to loosen rusted and frozen parts.

Our Penetrating Lubricant Spray is a multi-purpose product formulated to lubricate, penetrate, and displace moisture without using ozone depleters or chlorinated solvents. This product is fortified with PTFE and advanced corrosion inhibitors for superior lubricity and maximum protection of metal surfaces.

## PENETRATING LUBRICANT SPRAY

PROD. #1047933

Vehicle Maintenance – Lubricant

### FEATURES BENEFITS

Prevents Corrosion & Displaces Moisture
Penetrates & Lubricates
Stops Squeaks
Loosens Rusted & Frozen Parts

### DIRECTIONS

Remove cap and point spray tip toward surface to be treated. For confined space or hard-to-reach areas, insert extension tube provided.

**TO LUBRICATE:** Spray parts or surfaces liberally.

**TO PENETRATE:** Spray freely on frozen parts, tap lightly, allow a few minutes to penetrate and repeat as necessary.

**TO PREVENT CORROSION:** Spray all parts and surfaces regularly to maintain a corrosion barrier.

**TO DISPLACE MOISTURE:** Spray parts or surfaces, wait a few minutes and wipe off with a cloth. Re-spray for long term protection.
