

# ZEPOMATIC™ For Machine Dishwashing

### DESCRIPTION

Powdered chlorinated machine dishwashing compound. A heavy-duty combination of polyphosphates, alkaline builders and detergents.

### FEATURES

- Excellent cleaning action
- De-stains
- De-foams
- Hard water tolerant
- Biodegradable
- Quick dissolving
- USDA authorized

### BENEFITS

- Cuts and removes dried on food, grease, oil, and other food soils from china, plasticware, glasses, cutlery, pots and pans, etc.
- Chlorinated to bleach out stains from china and plastic ware. Heavily stained items should be pre-soaked for best results.
- Generates no foam of its own, and actually breaks foam generated by milk, egg, grease and oil, etc.
- Performance and rinsibility are unaffected by water hardness. No special water softening additives necessary. Prevents scale formation on spray jets and other machine surfaces.
- Contains only biodegradable detergents.
- Dissolves quickly and completely.
- Authorized for use as a general surface cleaner for all departments of federally inspected meat and poultry plants.

### APPLICATIONS

Recommended for use in: restaurants, cafeterias, kitchens, hotels, motels, hospitals, nursing homes, and other food service institutions. Cleans china, plastic ware, cutlery, glassware, pots and pans, etc. Not for use on aluminum or copper. Packaged in convenient Zep-Pak's and in larger bulk quantities.
