

Britney Spears Learning More About BodyFX

Spears was seen researching non-invasive aesthetic treatments, one of which is BodyFX, by InMode.

BodyFX is a new, long lasting, non-invasive solution to reduce the unsightly appearance of cellulite leading to improvements in your body contour. BodyFX uses a combination of different clinically proven modalities including radiofrequency energy, deep tissue heating and suction coupled negative pressure. The radio-frequency energy distributes heat to the skin and underlying fat, causing the tissues to heat and contract. The vacuum and controlled energy pulses then work synergistically to provide beautiful body contouring and apoptosis results.

BODY CONTOURING AND CELLULITE TREATMENT!

Discover a superior solution to improve the appearance of cellulite, reduce dimpled skin, loss of elasticity on the abdomen, love handles, hips, thighs AND other areas that require fat reduction.

"I lost inches in my thighs and my love handles and felt lighter. I would recommend this treatment to anyone who wants to get rid of that lumpy skin on their stomach, thighs, buttocks, or love handles."

WHAT IS BODYFX?
BodyFX is a non-invasive, non-surgical solution to reduce the unsightly appearance of cellulite leading to improvements in your body contour. BodyFX will improve your body to provide a non-surgical alternative to liposuction. BodyFX is a perfect solution to get rid of your recurring blemish or cellulite.

HOW DOES BODYFX WORK?
BodyFX uses a combination of different clinically proven modalities including radio-frequency energy, deep tissue heating and

HOW SAFE IS THE TREATMENT?
A series of RF energy is delivered by a succession of pulses at 1 million cycles per second. While the temperature rises, it is well controlled. The body's temperature will be constantly monitored, with ongoing suction feedback of the skin's temperature. The thermal monitoring provides the correct temperature control.

HOW MANY SESSIONS ARE REQUIRED?
It is recommended that every session be performed over an eight week period. Gradual improvements in the treatment area can be seen following the first few treatments - with the skin's surface feeling smoother and softer immediately.

WHAT KIND OF POST PROCEDURE CARE IS REQUIRED?
There is absolutely no downtime for BodyFX. It can be a lunch time procedure. Patients will notice redness and warmth in the treated area which will subside after 4-6 hours. There is no pain, bruising, or any other activities.

BodyFX™
NON-INVASIVE BODY CONTOURING & CELLULITE TREATMENT

BodyFX is the first and only technology which has only one patented, focused radiofrequency energy to target the specific fat cells, tighten the collagen and elastin. The result is not a reduction in fat, but also a remodeling and tightening of the skin - which is essential down goal for body sculpting.

BodyFX is a truly unique and made alone in its patented way to treat cellulite body for once with little to no pain or side effects.
