LOOKING YOU WITHOUT
INVASIVE SURGERY,
SCARS OR DOWNTIME.**

CUSTOMISABLE HANDS-FREE BODY TREATMENTS

Evoke is an industry first, remodelling tissues of the face and neck to achieve more defined facial features and jaw lines.

WHAT IS EVOKE?

Evoke is an innovative non-invasive solution designed specifically to target facial tissue. It is a quick and easy non-surgical alternative to remodel your face, chin, and jaw line. Treatments are customised and tailored to address your specific needs.

HOW DOES EVOKE WORK?

Evoke leverages clinically proven radiofrequency technology to deliver volumetric heating to the skin's subdermal layers. By directly addressing the jowls and chin, Evoke can help you achieve more defined facial characteristics.

Evoke was created and based on the development and clinical success of the proprietary A.C.E. (Acquire, Control and Extend) technology. A.C.E. technology targets deep within the skin to ensure that no areas are under, or over-treated, thereby maximising results and providing consistent outcomes.

HOW EFFECTIVE IS THE TREATMENT?

Evoke is recommended for patients who are seeking non-invasive facial remodelling treatments. Evoke can improve blood circulation and will provide a natural looking younger facial appearance. It is an effective procedure that can be used on all skin types. Evoke is designed with a Patient Call Button so you can easily pause your treatment at any time and have clinic staff make adjustments to ensure your comfort.

DOES THE EVOKE TREATMENT HURT?

Most clients find Evoke very comfortable. During your treatment you can expect a warming of your skin similar to a hot stone massage. It is a quick and comfortable treatment that can be done over lunch time. You will be able to sit up right and can surf the Internet, read a book, or watch TV while treatments to restore youth are being performed.

HOW MANY SESSIONS ARE RECOMMENDED?

Your practitioner will recommend the optimal number of sessions to be performed based on your personal objectives. Treatment times and frequency will be specifically tailored to obtain the optimal results. You will begin to see gradual improvements in the treatment area following your first few sessions.

WHAT KIND OF POST PROCEDURE CARE IS REQUIRED?

There is absolutely no recovery period or downtime associated with Evoke. It is a quick and comfortable treatment that can be done over your lunch time allowing you to return to your normal activities immediately.

Ask your provider to see if Evoke is right for you.
