EVOLVE TRIM

REDUCE DIMPLED SKIN & IMPROVE ELASTICITY

WHAT IS EVOLVE TRIM?

Evolve Trim is an innovative non-invasive solution designed specifically to reduce the unsightly appearance of cellulite. It is a quick and easy non-surgical alternative to liposuction which will reshape your body. Customised treatments allows you to improve the appearance of your skin on the back, abdomen, arms, knees.

HOW DOES EVOLVE TRIM WORK?

Evolve Trim leverages a combination of different clinically proven technologies to provide the ultimate customisable body and cellulite treatment.

A combination of radiofrequency energy, deep tissue heating, and vacuum design provide maximum results. Radiofrequency energy distributes heat to the skin and underlying fat, causing the tissues to heat. The vacuum and controlled energy pulses then work synergistically to provide natural body shaping results.

BODY CONTOURING AND CELLULITE TREATMENT

Ideal for all areas of the body that require fat reduction.

HOW EFFECTIVE IS THE TREATMENT?

A series of radiofrequency energy is delivered by a succession of pulses at 1 million cycles per second. To maximise comfort, the body's temperature is constantly monitored, with real-time updates on the skin's temperature at any time during the procedure. This thermal monitoring provides the utmost in temperature control while enabling you to achieve the maximum results. Evolve Trim is designed with a Patient Call Button so you can easily pause your treatment at any time and have clinic staff make adjustments to ensure your comfort.

DOES THE EVOLVE TREATMENT HURT?

Most clients find Evolve Trim comfortable. During your treatment you can expect a warming of your skin and gentle pulling sensation as the radiofrequency and vacuum work together to smooth out unwanted stubborn pockets of fat and remodel tissue.

HOW MANY SESSIONS ARE RECOMMENDED?

Your practitioner will recommend the optimal number of sessions to be performed based on your personal objectives. Treatment times and frequency will be specifically tailored to obtain the optimal results. You will begin to see gradual improvements in the treatment area following your first few sessions.

WHAT KIND OF POST PROCEDURE CARE IS REQUIRED?

There is no recovery period or downtime associated with Evolve Trim. It is a quick treatment that can be done over your lunch time, allowing you to return to your normal activities immediately. Patients will notice redness and warmth in the treated area which will subside after a few hours.

Ask your provider to see if Evolve Trim is right for you.
