

“
HRLV-E

the solution to both hair
and scalp problems

”

The solution to different hair and scalp problems

through the unique isolation and purification
technology ExoSCRT™ for ExoSCRT™ Exosomes

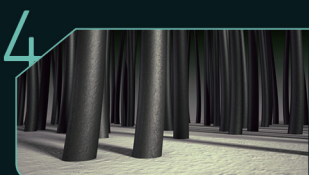

If you started to lose hair
and want to prevent
eventual baldness

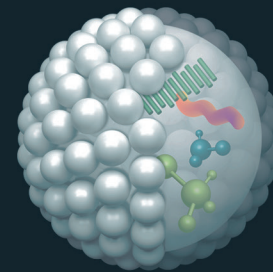

If you are worried
about the thinning hair
and want to increase
your hair thickness

If you are worried about
the problematic scalp and
excessive hair shedding

If you want an effective
solution for a healthy
hair and scalp

The true value of Exosomes created
by integrating innovation,
know-how, and technology

The above information describes the characteristics
of the raw materials
