Suction Coupled Basic RF

Controlled RF Heat Emitted

Emission of High Voltage ultrashort pulse duration RF

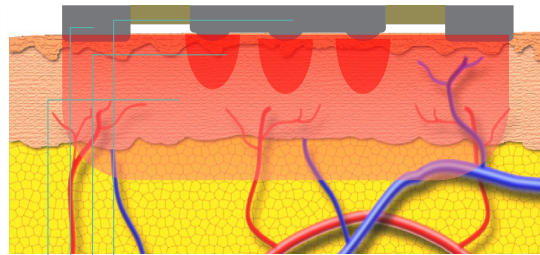

MINIFX

WHAT IS MINIFX?

- Contours and refines the lower face and submental area
- Radiofrequency thermal energy targets the skin and fat layer
- Emission of High Voltage ultrashort pulse duration RF
- Promotes up to 30% fat cell death (apoptosis)¹
- Heat penetration deep to 25mm Depth

2

- Smooth positive electrodes
- Non-ablative heating of the dermis
- Negative electrode bar
- Dermal heating up to 5mm depth

FORMA

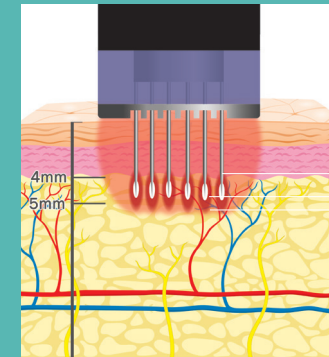

WHAT IS FORMA?

- Volumetric heating reaching deep to 5mm to effectively Target Fibroseptal Network (FSN) and SMAS resulting in skin tightening
- Effective dermal heating, stimulates 34.7% collagen and elastin remodelling²
- Proven RF Temperatures for effective dermal heating (43%)

2. Journal of Cosmetic and Laser Therapy, 'Split-face histological and biochemical evaluation of tightening efficacy using temperature- and impedance-controlled continuous non-invasive radiofrequency energy', Sylvie Boisnic, Marc Divarib, Marie-Christine Branchet, and Andrew A. Nelson

3

- Sub-necrotic bulk heating
- Ablation
- Coagulation

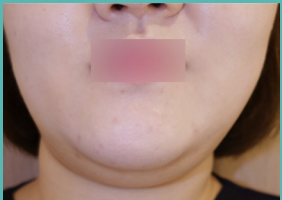

MORPHEUS8

WHAT IS MORPHEUS8?

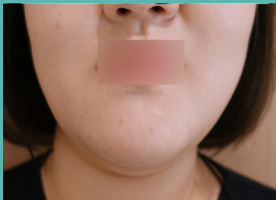

- Radiofrequency microneedling suitable for all skin types
- Treats scarring, open pores, fine lines and wrinkles
- Little to no damage to the surrounding tissue
- 0.5mm-4mm with additional 1mm heat Profile treating all 3 layers of skin

AN ALL-IN-ONE TREATMENT MADE UP OF THREE SUPERIOR TECHNOLOGIES OFFERING A LIFTED, MORE YOUTHFUL PROFILE IN JUST 6 WEEKS

HOW MANY SESSIONS ARE REQUIRED?

For optimal results we recommend a treatment course of once a week for six to eight weeks, depending on the severity, with varying combinations of the three technologies used, determined by the provider on the basis of your skin type and concern.

HOW LONG UNTIL I SEE RESULTS?

With noticeable improvements after the first treatment, you will continue to see the tightening and lifting of the skin throughout the treatment course, with optimal fat reduction results occurring after the completion of your treatment course.

WHAT SHOULD I EXPECT POST TREATMENT?

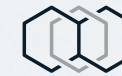

With your comfort and safety at the forefront, this complete lifting treatment is non-invasive and offers no-downtime, so you can carry on with your day after fast and effective treatment sessions.
