# DIOLAZEXL

## COMFORTABLE, SAFE & EFFECTIVE HAIR REMOVAL

### WHAT IS DIOLAZEXL?

DiolazeXL is an advanced laser hair removal procedure that safely and gently eliminates unwanted hair. DiolazeXL has one of the largest treatment spot sizes, making treatments convenient and fast. The combination of efficacy, patient comfort and speed makes DiolazeXL a leader in laser hair removal. It is powerful enough to target even the most stubborn hair.

### HOW DOES DIOLAZEXL WORK?

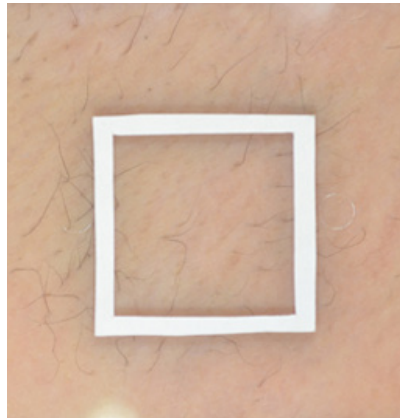

During laser treatment, a diode laser beam passes through the skin towards hair follicles. The penetrating energy then heats up the root of the hair, which in turn prevents future hair growth.

### HOW MANY SESSIONS ARE RECOMMENDED?

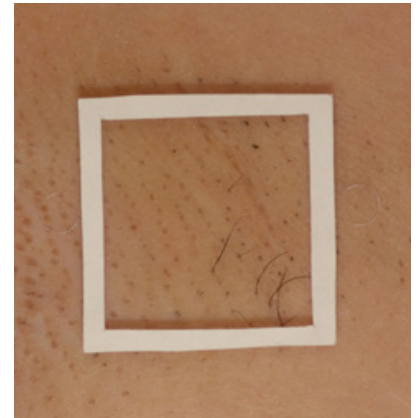

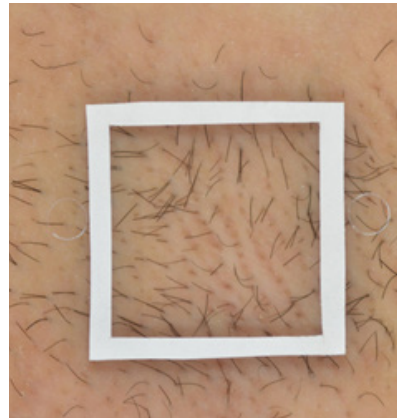

Hair is reduced with each treatment and results are observed after four to six sessions. The number of sessions will differ depending on your hair color, hair type, body area, and skin tone.

# VASCULAR BLEMISH SOLUTION

## WHAT IS VASCULAZE?

Vasculaze can help alleviate a wide variety of facial and leg vein issues with a laser that is targeted to treat the blood vessel causing the blemish. Vasculaze has a specially designed head that is built to pinpoint the vein or vein network, making treatments precise and safe.

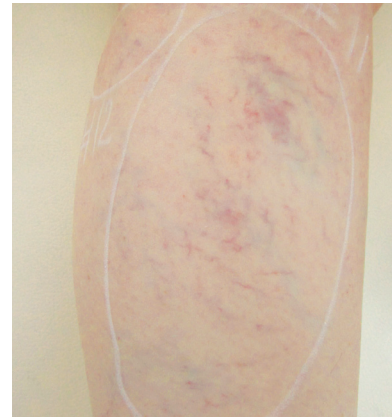

## HOW DOES VASCULAZE WORK?

The technology in Vasculaze sends pulses of light onto the vein, which makes the vein slowly fade and disappear, preventing the need for unpleasant incisions and needles.

## HOW MANY SESSIONS ARE RECOMMENDED?

Typically three sessions are performed, however, some lesions may require more. Gradual improvements in the treatment area can be seen following the first treatment – with the skin's surface looking clearer as treatments progress.
