NOTE:

Optimising Treatment Results with Exosome Technology

Optimal ASCE+ Exosomes Facial and Scalp Treatment results are achieved with integration of ASCE+ Exosome and ASCE Plus Exosome. Apply post-professional treatment application of either in the clinic. We urge practitioners to build the cost of 1 unit of ASCE Exosomes or post-professional treatment application along with 1 box of EXOBALM for patient home-care use.

Treatment Schedule

- ASCE+ Exosomes Microneedling Treatments: A minimum of 5 treatments is recommended for ASCE+ Exosomes Microneedling Treatments. Treatments are to be conducted 1-2 weeks apart with the 5th treatment being up to 1 month apart. Maintenance treatments should be conducted no less than once every 2 months to maintain and optimise treatment results.

ASCE+ EXOSOMES MIXING DIRECTIONS:

Step 1: [Unboxing & Unpackaging] Remove from refrigerator. Open carton and remove both vials [1 vial of Diluent] [1 vial of Lyophilised Exosomes].

Remove the metal seals and rubber stoppers from both the vial of Diluent and vial of Lyophilised Exosomes.

Step 2: [Reconstitute] Using a needleless syringe, draw out Diluent [5 ml] and reconstitute the Lyophilised Exosomes [20 mg]. Replace rubber stopper and shake gently until fully dissolved.

Step 3: [Use] Using the full vial, draw out the reconstituted product and apply a generous amount of solution to clean skin in areas where a ASCE+ Exosomes Facial

Step 4: [Follow Up] Follow with appropriate moisturiser and protection.

EXOBALM MIXING DIRECTIONS:

Step 1 : Combine Exosome Capsule (No.1) into Post-Care Optimising Balm (No.2). Mix thoroughly with the enclosed spatula. **Step 2:** Cleanse skin thoroughly and dry it completely.

Step 3: Apply EXO Balm to the skin in the morning and evening as needed.

Step 4: Follow with sun protection as specified by your Provider.
