Vaginal Health Concerns

As women age or after childbirth, there are many changes they may notice in their vaginal health...

Vaginal Laxity: caused by aging, genetics and/or trauma not limited to just vaginal childbirth. *Up to 76% of women may experience decreased sensation due to laxity during their lifetimes*

Stress Urinary Incontinence: SUI is a huge unmet need with currently no pharmacological agents to remedy this condition. It is typically treated with surgery or Kegel exercises to strengthen the surrounding structure of the bladder.

External Appearance: Dissatisfaction with the appearance of the external genitalia can lead to low self esteem, lack of confidence and reduced sexual satisfaction.

Vaginal Health Concerns (cont.)

Other common occurrences may be....

- Low blood flow and decreased sensitivity
- Wrinkled appearance of the labia
- Pain caused by labial hypertrophy

INMODE

A photograph of a female doctor with a stethoscope around her neck, smiling warmly at a female patient with long brown hair. They are in a clinical setting with a window in the background. The image is overlaid with a semi-transparent dark grey layer containing text.

Treatment Options

Kegel Exercises

Vaginal Cones

Tightening Creams

Vaginal Rejuvenation

Reconstructive Surgery

INMODE

Surgical History

The primary reasons for patients requesting labia reduction surgery:

- Aesthetic dissatisfaction: 87%
- Discomfort in clothing: 64%
- Dyspareunia: 43%

Previously, surgical methods were readily performed, but now more patients are gravitating towards non-invasive procedures like VOTIVA!

What is VOTIVA?

VOTIVA is a non-invasive treatment for both the internal and external areas of the vagina. It also has the option of a minimally invasive treatment to improve symptoms quickly, safely and comfortably.

It works by combining Fractional + RF Technologies

FormaV - subdermal RF heating for internal and external contraction

Morpheus8- non-invasive RF microneedling for skin resurfacing

FAQ

Q: What does the treatment feel like?

A: You can expect to feel a heating sensation during the treatment and for hours following the treatment.

Q: Is it painful and is there any downtime?

A: Some patients may experience slight discomfort during or immediately following the treatment. There is no downtime.

Q: How many treatments will I need?

A: Almost all patients need the package of 3 treatments with FormaV and may need an additional treatment. FractoraV is typically done one time.

Q: How quickly will I notice results?

A: Most patients see and feel positive results immediately. Optimal results come after the third treatment is completed.
