- 8 x green side clips & 1.25 inch screws
- 4 x 1.5 inch screws
- 2 x gate fastener
- 1 x instructions

Parcel 2

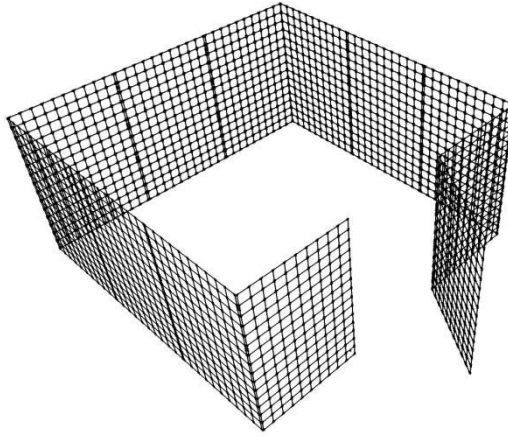

- 12 x Mesh Panels

Building your Whelping Pen

First select a site large enough and suitable enough for the pen, approx. 2mtr square.

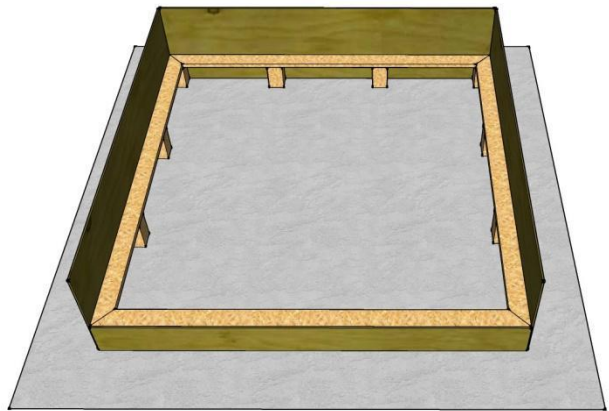

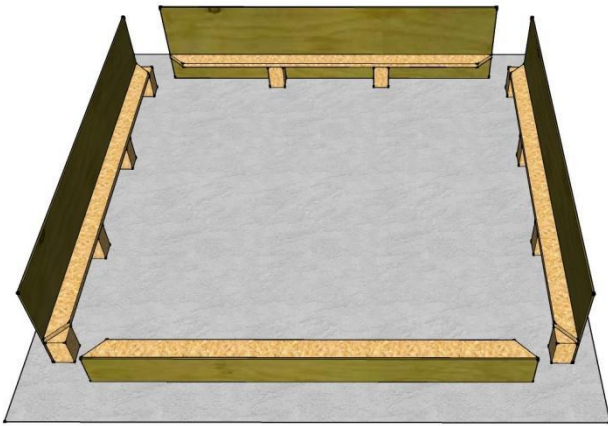

Next lay out the white PVC sheet level and flat in your selected area, this is to protect the floor from any puppy mess.

Next join the twelve "Flexipanel" together with the green clips provided, using four per joint on the long side of the panels, As per the image below. To make attaching them easier it is advised to warm them up in some warm water which will then make them a little more pliable.

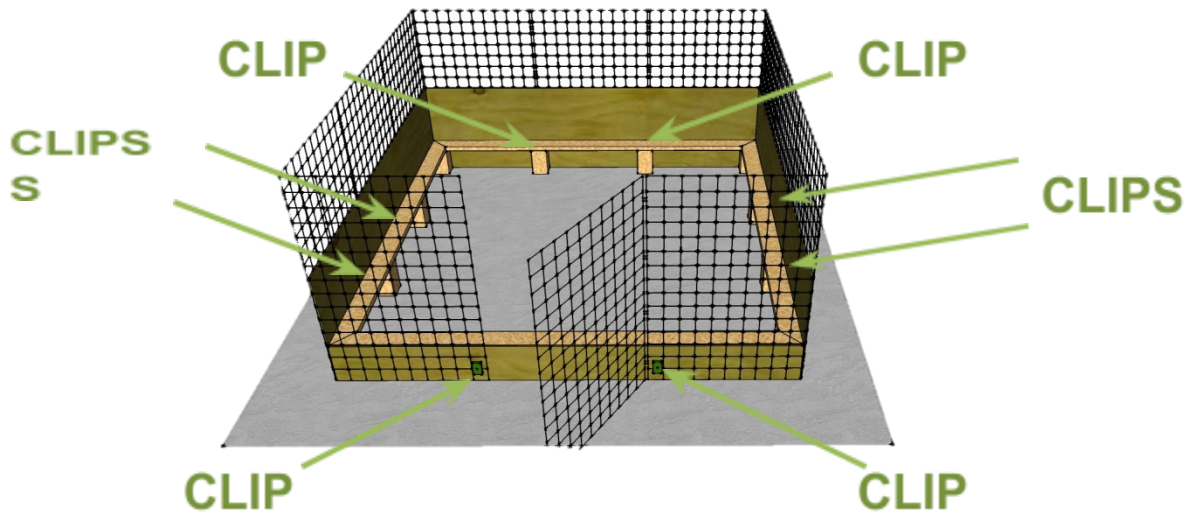

Then connect the final panel (door) using the 2 spring clip fastener at the opening end. The gate can be in the middle as above or off set to one edge.

Next layout the four timber sections as the plan below inside the mesh panels, check to make sure it is square then secure with the four screws provided in the pre drilled holes in the corners.

Leaving the lowest part at the position you want your door.

Next take the flat green pre-drilled clips and secure them with the screws provided to secure the mesh panels to the timber inner frame on each of the timber centre blocks. The clips must be secured to the block area, if not the sharp points of the screws could potentially cause harm to any puppies.

The timber inner frame will give the pen its strength and not allow it to move when pushed on by your puppies or dog.

Alternatively the whelping insert can be removed completely to provide a puppy play pen. To extend the pen you can order more panels at www.pdotwolf.com.

Later on you can use the same panels for various uses:

Across doorways, larger playpens, around the edges of your garden, across your driveway or pathway. In the back of your car, at the bottom of the stairs...the situations you can use this fencing for are endless...Indoors or Outdoors. Also ideal for poultry and small pets. We also do permanent dog fences complete with wooden posts.

If you want to add more panels they are available from our website or just give us a ring and we will endeavor to help you whatever your requirements.

We also offer a larger mesh dog fence which is ideal for larger dogs...once again please visit our website for more details.

Visit www.pdotwolf.com Telephone: 01282 792926

After use store your pen in a dry area ready for next time
