

Building your Whelping Pen

First join the four “Flexipanel” together with the green clips provided, using four per joint, leaving one corner section loose. To make attaching them easier it is advised to warm them up in some warm water which will then make them a little more pliable.

Then connect the final panel (door) using the spring clip fastener.

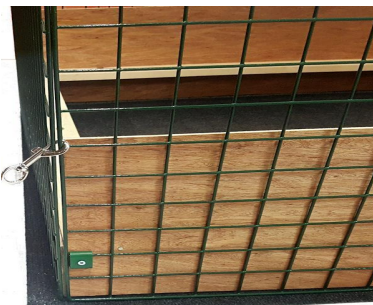

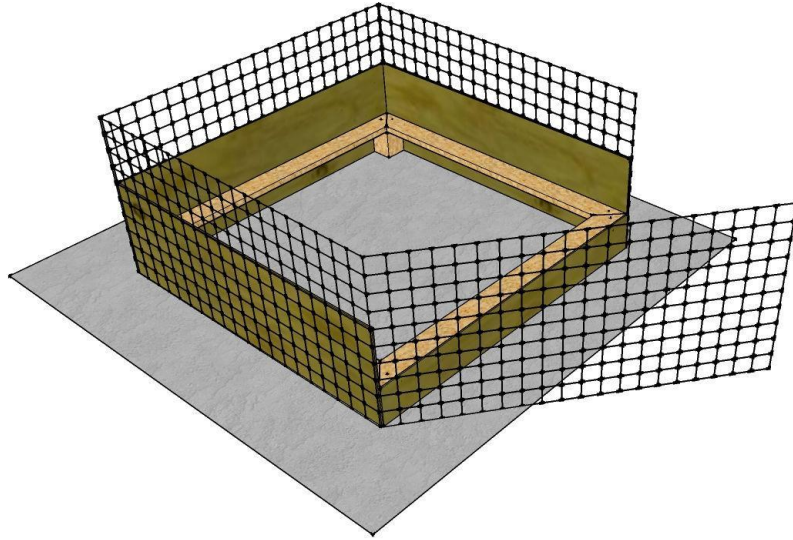

Next lay the four wood side panels in a square and join them together with the four screws supplied. Next place the PVC sheet on the floor in the area you are intending to site your whelping Pen.

Then place the timber sections inside the “mesh” pen, Leaving the lowest 5” part at the door side.

Then secure the pen to the timber section with the two green clips and screws provided.

Once the pups have grown larger and more active, you can adjust the pen by removing the two green clips and then turning the wooden insert around so that one of the 12" panels is now on the door side. To fix in place attach the green clips once again.

Alternatively the whelping insert can be removed completely to provide a puppy play pen. To extend the pen you can order more panels at www.pdotwolf.com.

For a fence for larger dogs the panels can be used at 1m high rather than the 0.5m height. Just turn them round and clip them together!

Later on you can use the same panels for various uses:

Across doorways, larger playpens, around the edges of your garden, across your driveway or pathway. In the back of your car, at the bottom of the stairs...the situations you can use this fencing for are endless...Indoors or Outdoors. Also ideal for poultry and small pets. We also do permanent dog fences complete with wooden posts.

If you want to add more panels they are available from our website or just give us a ring and we will endeavour to help you whatever your requirements.

We also offer a larger mesh dog fence which is ideal for larger dogs...once again please visit our website for more details.

Visit www.pdotwolf.com Telephone: 01282 792926

After use store your pen in a dry area ready for next time

1m x 1m Whelping Pen
