

## **Puppy Play Pen Instructions**

The puppy play pen you have purchased will consist of the following panels and relevant green snap clips dependant upon the size you have ordered -

1m x 1m = 3 x 1m x 0.5m Panels and 2 x 0.6m x 0.5m Panels

1m x 2m = 5 x 1m x 0.5m Panels and 2 x 0.6m x 0.5m Panels

To build the puppy play pen, join each panel together with 4 green securing clips on the 0.5m (short) side until all the panels are connected together apart from at the end of the two 0.5m x 0.6m panels.

Next place the panels in either the square formation or rectangle formation depending on the size you ordered, when in the correct position the fence should stay up on its own.

Using one or two of the clips provided overlap the small 0.6m x 0.5m panels by 4 small squares as shown below. 2 gives the gate more stability however 1 should work for ease of use.

This will create a secure gate at the front of the puppy play pen, allowing you to open and close the pen with ease.

Then if you would like to store the pen away or transport it to another location you can simply unclip the gate at the front and fold the panels into the 1m x 0.5m formation using the velcro strap provided to lock the panels in place as shown below.
