

Work Less and Play More

- Provides a soft surface to help keep children safe on the playground
- Warranted against fading for up to 12 years
- IMC's most affordable rubber mulch groundcover for playgrounds and paths
- Maintains beauty even after years of exposure to the elements
- Five times heavier than wood mulches, this rubber mulch will not float, absorb water or erode during heavy rain and flooding
- Does not attract termites, carpenter ants or other harmful insects

NuScape Rubber Mulch Nuggets

NuScape is sold nationwide in the colors of Brown and Red at retailers such as: BJ's Wholesale Club, Ace Hardware, True Value and Do it Best. NuScape, is also sold regionally at select Lowe's locations in the color Red. If you are looking for a color match to a nugget mulch made by IMC Outdoor Living, please contact us so that we can guarantee your satisfaction.

Installation Guidelines for Playground

- The ground area where the playground will lie should either be in location that will not hold water, or have slight grade to allow for proper drainage. In areas where drainage could be an issue; it is recommended to install a drain tile system, with a 3" base of pea gravel or rock to allow for proper drainage.
- Heavy duty weed fabric should be installed under NuScape Mulch to separate the mulch from what lies beneath. Depending on the size of the playground, it is recommended to use large rolls of weed fabric (12' width rolls) to minimize the number seams.
- Use landscape stakes to stake down weed fabric seams and corners. Make sure the stakes are completely hammered down.
- A border is recommended to enclose the playground to contain the mulch. It is recommended to have a few inches between the top of the border and the top of the mulch.
- It is recommended to loosely compact the mulch to either 3 or 6 inches to achieve the desired fall height rating.

Installation for Landscaping

- Install NuScape Mulch at a 2" depth.
- It is not necessary, but recommended to install NuScape Mulch over a permeable weed fabric. Using a weed fabric will increase coverage per bag/box and decrease risk of weeds. Also, using felt type weed fabric will help keep the mulch in place.
- If installing NuScape Mulch over existing mulch/soil, make sure the ground surface is a compacted material, free of debris and loose objects. NuScape Mulch will look its best when not mixed in with other debris.
- When installing NuScape Mulch in mulch/plant beds, it is recommended that the beds have a border to help contain the mulch. The border can either be a raised border such as a poured concrete/brick border, or a dug border such as a 2" deep trench around the bed.
- To clear leaves and other debris off the top of NuScape Mulch, use a blower on a low setting. Since NuScape Mulch is heavier than grass clippings and leaves, it will stay in place while the debris is blown away.
