- Textured surface reduces the risk of slippage on bridges, steps, walkways, and cart paths
- Porous Construction:
 - Allows moisture to flow through footing surface eliminating standing surface water
 - Allows for moisture evaporation beneath the mat reducing algae growth
- Antimicrobial formula guards against the growth of mildew, fungi, and bacteria.
- Trims easily with razor knife for custom fitting on all areas
- Will not absorb and hold water
- Resistant to wind uplift
- Lightweight for easy handling
- Cleans easily with sweeping or wash down
- Now on over 3,000 Courses

The Choice for Safety & Slip Resistance Around the Golf Course Since 1997

Customer Testimonials

“Mayacama Golf Club is a walking only golf course complimented by a professional caddie program. We focus on maintaining a quality walking experience.”

“Numerous stairways and wooden bridges are used to access greens, tees and fairways and we use PEM Golf Course Matting on all surfaces to provide a non-slip surface for our members, guests, and caddies, on the golf course. The matting provides excellent footing for players wearing spikes and ensures a safe working environment for our caddies in all weather conditions.”

“Additionally, the matting has an excellent aesthetic quality that we are happy to incorporate into the look and feel of our walking experience on the golf course.”

Dale Engman
Golf Course Superintendent
Mayacama Golf Club
Santa Rosa, CA

“Here at Valhalla, we have many bridges and I seemed to get a call every time it rained on someone slipping. The P.E.M. Golf Course Matting solved our problems and the best part is that it drains and helps in preserving the wood. It’s helped our members as well as the best players in the world.”
