Anxiolytic*
Drug that relieves anxiety

Antiemetic*
An anti nausea drug*

Appetite stimulant*
Aids in increasing hunger

Analgesic*
Acts to relieve pain

LAB TESTED

What is Delta-8

Delta-8-THC is a powerful cannabinoid native to the cannabis flower. Though typically found in only very small amounts (Compared to Delta-9-THC) it's a psychotropic, well known cannabinoid relative.

While only a few atomic bonds are different from Delta-9-THC, Delta-8-THC offers a unique, potent high all it's own. Delta-8-THC is an isomer of CBD, a derivative of hemp and CBD, a cannabinoid found in hemp, and is ultimately contained in our extracts with less than 0.3% Delta-9-THC.

Is it Legal?

The 2018 Farm Bill specifically made all derivatives, isomers, and cannabinoids in hemp legal, provided the final product has less than 0.3% Delta-9-THC.
