

# THE STRAITS

---

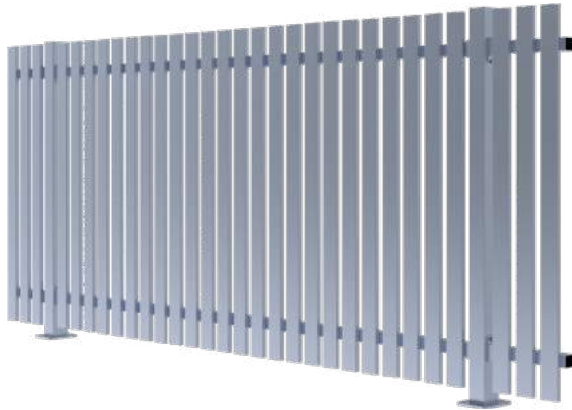

## Aluminium Picket Fence

---

A traditional looking picket fence that is fast to install and doesn't need painting!

Timber pickets are slow to install because you have to cut and nail them on site. And then they need to be painted. The Straits replicates this traditional look with a fully welded and powder coated aluminium fence panel system.

It's fast to install and fence panels together with a matching series of gates compliment the range.

## Design Details

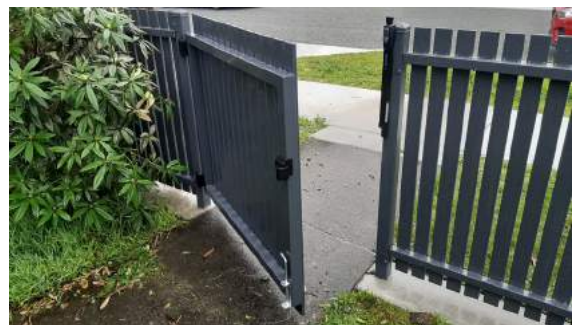

---

### Matching Gates

Matching pedestrian and driveway gates can be made to order to suit the width and height of your fence. Attention to detail such as the choice of hinges, latches and fence brackets mean that the gates blend into the fenceline when used with 65 SHS posts.

### Great for the Customer

- Lasts longer than timber
- No warping or fading
- Smooth finish and clean look

### Multiple Applications

- Landscape Fence
- Privacy Fence
- Infill panels on block walls
- Slide, Swing and Cantilever gates can be made to order to suit your entrances.
