

LOW BATTERY INDICATOR

With approximately 15% battery capacity remaining, the indicator light on the headlamp will turn from blue to red.

BATTERY CHARGING

1. Plug the AC Power Adapter into an electric outlet, then plug the cable from the AC Power Adapter into the Li-Ion Battery.
2. The indicator light will be red until the Li-Ion battery is fully charged; then it changes to blue.
3. Unplug the AC Adapter from the Li-Ion Battery by grasping the connectors rather than the cable.
4. Leaving the Li-Ion Battery and AC Adapter connected indefinitely will not harm the batteries.
5. When storing for an extended period of time, charge battery every 4-6 weeks to maximize battery life.

DISCOVER THE NIGHT

Thank you for choosing the Digital Patrol from NiteRider, the innovator in technical lighting systems. The Digital Patrol combines a high-powered white LED headlamp and a Li-Ion Battery.

To get the most from your NiteRider light, we urge you to familiarize yourself with the following safety and operating instructions.

RIDING AT NIGHT

While the Digital Patrol lighting system will improve your view, control and enjoyment of night riding, please remember that cycling at night is an inherently dangerous activity. In addition to using your lighting system properly and riding with extreme caution, NiteRider urges you to:

- Never ride alone.
- Always let someone know where you are going.
- Wear a helmet and reflective clothing.
- Carry an auxiliary light and emergency supplies.
- Make sure the headlamp, mounting bracket and battery are securely fastened.
- Always disconnect the battery from the headlamp when transporting the light system.

PROTECTING YOUR INVESTMENT

Properly charge your battery to maximize its lifespan (see the "Battery Charging and Care" section for detailed information).

The Digital Patrol will perform in wet weather conditions, but submerging it in water will damage the system.

SUPPORT

If you experience difficulties during product installation or operation, NiteRider provides free telephone support on weekdays from 8:00 AM to 4:30 PM (Pacific Time) at 800.466.8366, extension 4. You may also e-mail us at support@niterider.com.

WARRANTY

NiteRider stands behind its products with the following warranties:

- Lifetime warranty on all mechanical components
- 2 years on electrical components
- 180 days on rechargeable batteries

To obtain warranty service, it is preferable to have your original sales receipt. Contact the NiteRider customer service department at 800.466.8366, extension 4 to obtain a Return Merchandise Authorization (RMA) number. The RMA number must be prominently displayed on the outside of your package. The product must be properly packaged to prevent damage in transit. For complete warranty information, please visit our website at www.niterider.com.

Digital Patrol LED User Guide

The Digital Patrol will run up to:

Light Level	Time*	Lumens
High	3:30	700
Med	7:30	300
Low	22:30	150
Pursuit	42:00	N/A

* Run times are approximations and will vary.
