

HAPPY PMS

MOISTURIZING BODY CREAM

The most effective method of restoring physiological levels of natural progesterone is by transdermal cream.

Happy PMS Body Cream is a technologically advanced, light, greaseless moisturizing formulation of natural progesterone in a hypoallergenic, non-comedogenic (won't clog pores), vitamin E base that is free of odor and fragrance.

Ingredients: *Purified Water, Stearic Acid, d-alpha Tocopherol (Vitamin E), Natural Glycerine, Avocado Oil, Natural Progesterone (USP), Aloe Vera Oil, Rosemary Extract, Vitamin A Palmitate, Carrot Oil, Lemon Grass Oil.*

Natural progesterone in a moisturizing cream can be applied to the face, neck, inner arms, chest, breasts, hands or soles of the feet. The cream is readily absorbed and leaves no trace after a few minutes. During absorption the cream by-passes the liver and goes to specific receptor sites where progesterone is needed.
