Xlear Nasal Spray 1.5 oz

Saline nose wash with Xylitol.

Directions:

Clear the nasal passages by gently blowing your nose prior to using Xlear. Remove the safety clip on the bottle. Prior to initial use, prime the pump by holding it upright and pumping 1 or more times into a tissue until the solution is dispensed. Insert nozzle into nostril and depress pump completely while breathing through your nose. Spray 1-2 times in each nostril. Use preventatively as often as needed to cleanse the nasal passages and sinuses. For best results, use at least twice daily. The metered nasal pump sprayer provides a precise amount of the soothing spray in a fine mist. Wipe nozzle clean after each use and replace cap.

WARNINGS: The use of this container by more than one person may spread infection. Keep out of reach of children.
