

Eskabe LPG and Natural Gas Balanced Flue Heaters

Eskabe balanced flue heaters provide a modern and effective solution for the safe heating of bedrooms. The thermostat function ensures efficiency and comfort whilst the patented aromatiser eliminates odours keeping rooms fresh and free from moisture. All models meet SABS and LPGASA standards and are fully fitted with safety devices & features to ensure your family's health and safety are maintained.

ESKABE SAFETY FEATURES INCLUDE:

External bulb sensor: externally mounted sensing system which regulates power to keep desired temperature constant in the room thus saving gas.

Thermostatic control: Thermostatic models feature a control knob to adjust the room temperature. You set the temperature you like and the thermostat will cycle the burner on and off to maintain the room temperature. This minimises gas usage and maximises your comfort.

Monoxiprotector: as combustion products discharge this safety device acts to prevent the release of combustion products into the room under abnormal draught conditions.

Safety valve: device that shuts off the gas supply to the appliance, in case of pilot burner or gas supply failure occurs.

3000 kcal/h
Heating Capacity:
Up to 28 m² (301 ft²)

5000 kcal/h
Heating Capacity:
Up to 46 m² (495 ft²)

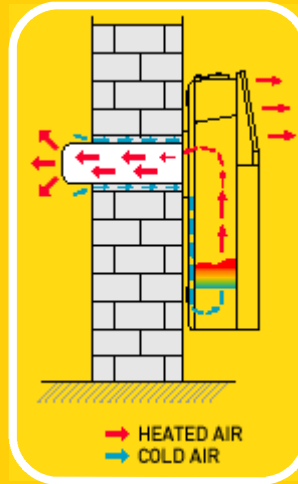

EXTERNAL BULB SENSOR

SAFETY:

Its sealed combustion chamber ensures safe performance by separating the heated air from the combustion gases, which are expelled outside.

All heaters are fitted with Safety Valve that shuts off the appliance's gas supply in the event that the pilot burner goes out or a gas supply failure occurs.

MODELS	TBU3 TE	TBU5 TE
Power Input (Kcal/h)	3000	5000
Power Input (KW)	3.49	5.81
Power Input (Btu/h)	12000	20000
Fuel	Natural Gas or LPG / Propane	
Cabinet Height	50.8cm	50.8cm
Cabinet Width	44.1cm	69.5cm
Cabinet Depth	14.8cm	16.6cm
Vent Opening Required	15.2cm	17.8cm

Eskabe LPG and Natural Gas Wall Mounted Heaters

Wall Mounted Heating system: the most accessible system designed for rooms with sufficient permanent ventilation in accordance with the LPGASA regulations. Permanently wall mounted, these heaters are great value for money.

- Fitted with Room Aromatiser which, by means of a simple procedure, perfumes the room making it more comfortable.
- Easy installation: no building in of outside ventilation, avoiding the breaking of walls.
- Convection: The design of their heated-air outlet causes the stream of heated air to circulate throughout the room to keep a uniform warm temperature, even in far corners.
- Attractive style: The Eskabe heater's slim design matches any room location. The reduced overall dimensions of the units compare favourably to other heaters of similar heating capacity.
- Controls located on the top of unit for ease of operation and security from little fingers

OPERATION OF THE AROMATISER:

5000 kcal/h
Heating Capacity:
Up to 46 m2 (495 ft2)

8000 kcal/h
Heating Capacity:
Up to 88 m2 (946 ft2)

MODELS	MX 5	MX 8
Power Input (Kcal/h)	5000	8000
Power Input (KW)	5.81	9.3
Power Input (Btu/h)	20000	32000
Fuel	Natural Gas or LPG / Propane	
Cabinet Height	50.8cm	50.8cm
Cabinet Width	44.1cm	69.5cm
Cabinet Depth	14.8cm	16.6cm
Vent Opening Required	14.8cm	16.6cm

SAFETY:

- 1) Safety valve: shuts off the gas supply to the appliance in case the pilot burner goes out or there a gas supply failure occurs.
- 2) Oxygen depletion Sensor: the built in ODS Pilot monitors the room oxygen level and automatically shuts off the gas supply to the appliance if the oxygen level decreases.
