

# Estrella

Uniform fruit shape and exceptional flesh quality combined with an early maturity make Estrella a market leader, while its larger plants protect the fruit under poor growing conditions.

## FEATURES

- Allsweet-type hybrid
- Early maturity
- Fruits have a firm flesh with small seeds and smaller seed pockets
- Resistance to Anthracnose and Fusarium wilt
- Uniform fruit size, averaging 20 to 24 pounds
- Larger plant with heavy, concentrated fruit set

## BENEFITS

- Classy and uniform fruit shape can mean more potential marketable yield
- Improved post-harvest handling and extended shelf life
- Larger plants can provide more protection for the fruit under less than ideal growing conditions

## TECHNICAL DATA

Approx. days to maturity	80
Fruit shape	Long, blocky
Fruit weight (lbs)	20 to 24
Rind pattern	Dark green with broken, light green stripes
Flesh description	Dark red flesh with small seed
Disease resistance*	<b>IR:</b> Co: 1 / Fon: 1

## DISEASE ABBREVIATION KEY

<b>Co</b>	Anthracnose caused by <i>Colletotrichum orbiculare</i>
<b>Fon</b>	Fusarium wilt caused by <i>Fusarium oxysporum</i> f. sp. <i>niveum</i>
<b>HR</b>	High resistance
<b>IR</b>	Intermediate resistance
