SAFETY

Before every ride, check your bike for proper setup, including, but not limited to: functioning front and rear brakes, firm attachment of wheels, and correct attachment of handlebar and stem. Please install the reflectors included with your bike. Install the white (front) reflector facing the front of your bike and the red (rear) facing the back of your bike. Reflectors are not a substitute for front and rear lights when riding in low-light conditions - you should use lights if you are riding outside of daytime hours.

Obey all local traffic laws and watch carefully for changing conditions every time you ride. You should wear an approved bicycle helmet every time you ride a bicycle, regardless of the legal requirement to do so.

FIXED GEAR RIDING

6KU Urban Track and Fixie models feature a “flip-flop” rear hub. This hub allows for singlespeed (the rider can coast) and fixed gear (the rider cannot coast, whenever the wheel is turning, the pedals are also turning). Beginning riders should start with the singlespeed setup.

If you decide to ride fixed gear, we recommend that you always have brakes installed on your bike. You should also use foot retention, such as clipless pedals and matching shoes, or toe clips and straps, when riding fixed gear.

HOW TO CONTACT US

If you need help assembling your bike, contact 6KU at info@6KU.com, by calling (866) 300-3311, or by using the Live Chat feature on our website.

WARRANTY SUMMARY

The 6KU warranty covers defects in craftsmanship or manufacturing. It does not cover damage caused by crashing, accidents, or errors in assembly. 6KU bicycle frames and forks carry a lifetime warranty. The components on 6KU bicycles carry a one year warranty.

To activate the warranty on your bike, assembly must be performed by a qualified person knowledgeable about bicycle assembly and function. That includes bicycle shops and mobile repair services like [Velofix](#) or [Beeline](#).

Damage caused by errors in assembly (e.g. stripped threads) is not covered by the 6KU warranty. If you are having difficulty in the assembly or service process, seek out professional assistance to ensure the activation of your 6KU warranty.
