KARTELL BIO

Our ongoing research and innovation in industrial processes have enabled our design to be produced with a biopolymer made from renewable raw materials, derived from non-GMO agricultural materials not intended for the food chain.

The product contained in this packaging meets the sustainability requirements highlighted in the "Kartell loves the planet" manifesto and conforming with UN 2030 Agenda for Sustainable Development.

The product has obtained TÜV Austria certification with the maximum stars and, as a designer product, will only gain value over time.
