

BRANCH CHAIR

Inspired from tree branches, the Branch outdoor chair looks fluid and organic. Behind the airy, slimline appearance lies a sophisticated design and well thought-out materials. The aluminium die-cast frame is powder-coated with a double layer for a superior scratch and uv-resistance. The seat and back are made of polypropylene, reinforced with glassfiber. The seating comfort of the garden chair is extraordinary thanks to the anatomic resilience of the back. Aluminium and polypropylene are excellent outdoor materials, easy to clean, weather-resistant and 100% recyclable. The Branch garden chair is available with armrests or without and is stackable for easy storage.

DIMENSIONS (cm's)

44.7 W x 55 D x 79 H
