

DEN

COLLECTION

The Den's design nods to the relaxed modernism of the mid-20th century. The sweeping slope arms create support and equally indulgent comfort. A belt of leather follows the arm profile and encircles the body across the length of the back. Like it's come straight off the set of Mad Men, Den is finished in a premium buttery-feel full grain leather with a distinctive look achieved from it's multi-stage vintaging process. The seat rests on a die-cast aluminium base with a matte black finish, which enhances the sofa and recalls the metal finishes of exquisite leather bags.
