

## LUX 401

Stay in the shade as much or as little as you want! The LUX 401 umbrella can turn 360° and tilt with an easy wind of the handle. As the sun moves through the day the mobile granite base allows full mobility so you can stay protected from the sun's rays all summer long.

The umbrella's increased durability is due to the aluminium that is thicker than average. Nevertheless the pole and the ribs maintain a thin and slender look. The transition from pole to base is subtle and almost invisible.

## DIMENSIONS

3.7m x 3.7m x 2.5 H

300kg mobile granite base
