

MOTU

MOTU features CKD-MemoryRope® made from polyolefin threads woven to look like a rope, this is one of the latest trends in outdoor furniture materials. Highly fade, rot and UV resistant, MemoryRope® has a soft elastic feel to maximise comfort whilst retaining its original form. MOTU uses a powder coated aluminium frame - arguably the easiest care material available for outdoor furniture. Cove Outdoor use only extruded and clean dipped rust-free aluminium, powder coated and baked to create highly durable paint finish.
