

SCRAMBLER

Inspired by the trend of scrambler motorcycles which began in the UK; everyday road bikes customised by racers to perform on any type of terrain. The same ideology of customisation and versatility was applied to the Scrambler sectional sofa, beginning with the seat comfort, which is designed with an initial soft layer transitioning to a more supportive and incredibly comfortable sit, reflecting the modified seat suspension of the motorcycles. The leather is perforated on the seat and seat back, finished off with a light distress to mimic vintage motorcycle riding leathers. The side table was inspired by the clutch plates of a transmission, with exposed weld marks to embody the raw machinery of the original scramblers. Just as scrambler motorcycles evolved to conquer any terrain, the Scrambler sectional can be customised in a range of configurations to conquer any space.
