

SELENITE LAYER PENDANT

A sculpture in its own right, the Selenite Layer pendant and sconce are created entirely by hand using shards of natural selenite.

Named after the Greek goddess of the moon, selenite is known for its soft pearlescent glow similar to moonlight. It is the crystalline version of the mineral Gypsum and is revered by many for its spiritual and protective properties with some believing it unlocks the chakra of divine wisdom. The oldest Selenite crystal ever discovered was 500,000 years old in Chihuahua, Mexico. Suspended like glistening stalactites, the crystals in our Selenite Layer lighting collection are painstakingly affixed to the frame one by one.
