

DESCRIPTION

Senja invites you to relax in a collection that marries comfort and versatility. The armchair combines a light design with gentle, body-contoured support from its Canax® back rest. The lounge chair is defined by an extra-deep seat and wider back-rest for absolute comfort. The Senja lounge has voluminous cushions for absolute ease and can be fitted with a full-length teak side table.

MATERIALS

- Frame: powdercoated aluminium
- Seat lounge: Batyline®
- Backrest chairs: Canax® - the core is made of polyester, the outside is a mix of pvc and hemp fibres
- Legs chairs: powdercoated aluminium or plantation teak from East-Java
- Optional side table: plantation teak from East-Java
- Hardware: 316L electropolished stainless steel

CUSHIONS

All our cushions are weatherproof, which means you can leave them outside, even during short periods of rain. The filling has a cover in laminated, water-repellent polypropylene and the thread used to stitch the seams swells when getting wet, preventing water from penetrating through the seams. As an extra precaution, the seams are protected on the inside with an extra covering. Fabrics are available in category D, E & F. The cushion of the lounge has a piping in the same fabric colour.

PROTECTION COVERS

Covers are available that protect your sofa against dirt. These covers in grey colour are made of PU coated polyester which is water-repellent and UV-resistant. Thanks to their excellent breathable qualities the covers reduce condensation and heat build-up, helping to prevent the formation of mold and mildew. Always make sure that furniture, cushions and covers are completely dry before covering furniture.

MAINTENANCE

Frame

Clean the aluminium frame with tap water and a PH neutral soap. For stubborn stains, use Aluminium Cleaner. We advise to use Teflon® Protector twice a year which applies an invisible film and protects the aluminium against the adhesion of dirt.

(spray that lays an invisible dirt-repellent film)

Batyline seat lounge

The Batyline seat can be cleaned with soap and water. For stubborn stains use Synthetics Super Cleaner. Apply with a soft brush on both sides. Leave to soak for a while and rinse with a garden hose. Canax® requires hardly any maintenance and is easy to clean with clear water and a PH neutral soap. Stubborn stains and persistent green deposit can be removed with Synthetics Super Cleaner. We recommend to treat the Canax® weave with Synthetics Protector which applies an invisible dirt and water repellent film.

Teak side table

Treat new teak with Teak Protector 4 à 6 weeks after installation. Teak Protector applies an invisible film that prevents stains and green deposit. Soiled teak can be cleaned with Teak Super Cleaner. Leave the furniture to dry completely and then apply Teak Protector. To avoid labour-intensive cleaning, you can treat the wood with Teak Sealer. A simple cleaning with water and a ph-neutral soap will do for many years. Teak Sealer contains UV protection to slow down the graying from the sun as well as a fungicide to prevent the growth of mold and mildew.
