

NATAL ALU SOFA

DESIGNER

Studio Segers

DESCRIPTION

A subtle frame with attractive, curved armrests contrasts beautifully with the volume of the outdoor cushions, supported by a weave in broad textilene straps. Timeless and elegant, the Natal Alu Sofa is an outdoor sofa that will fit many terraces. With thirteen different modules, three different frame colours and more than 70 available outdoor fabrics, the possibilities are endless. The frame in solid aluminium is powdercoated with an ultra durable polyester powdercoating for extra scratch and UV resistance. Special attention is paid to the outdoor cushions which can be left outside during the whole outdoor season thanks to the ventilating filling in a waterproof cover.

MATERIALS

- Frame : aluminium, powdercoated with an ultra durable polyester powdercoating
- Hardware : The different modules can be connected neatly by CNC cut solid powdercoated aluminium parts, making the assembled sofa look as one solid piece.
- Seat surface : textilene straps, UV-, mildew- and rot resistant. Each strap is individually connected, allowing easy replacement.
- Cushions : water-repellent filling, UV-resistant outdoor fabric

CUSHIONS

Fabrics : cat. D & E (outdoor filling)

The references of the cushion sets (seat and back) of each available item are listed on the previous pages.

All cushions are water-repellent. The filling has a cover in laminated, water-repellent polypropylene which prevents water from penetrating. The thread used to stitch the seams swells when getting wet, preventing water from penetrating through the seams. Moreover, the seams are protected on the inside with an extra cover. If nevertheless water should penetrate, the material is breathable, letting moisture out to prevent moulding.

PROTECTION COVERS

Covers in waterproof, PU-breathable material are available for each item. Colour grey.

MAINTENANCE

Clean the aluminium frame with water and a non-caustic, uncoloured fluid detergent. Allow detergent time to act. For stubborn stains, Aluminium Cleaner can be used. We advise to use Metal Protector twice a year which applies an invisible film and protects the aluminium against the adhesion of dirt. The textile straps can be cleaned with Synthetic Super Cleaner. Rinse thoroughly with water.
