About The Fourth R

The Fourth R is a skills-focused relationship based approach aimed at preventing adolescent violence and related risk behaviors.

Newly revised in 2015, The Fourth R program applies a youth-focused, harm-reduction strategy that encompasses knowledge, positive relationship skills, and decision-making. The curriculum meets National Health Education Standards and is taught by classroom teachers. It is a universal approach that includes all adolescents in education about safety and risk. The Fourth R covers four main units: Personal Safety and Injury Prevention, Substance Use, Addictions and Related Behaviors, Human Development and Sexual Health and Healthy Eating. There are assessment and evaluation tools provided within the resources and there is a culminating activity at the end of each unit.

The Fourth R - Grade 7

Each lesson is 40-45 minutes in length

### Unit 1 - Personal Safety and Injury Prevention

| Lesson 1 | Healthy Relationships |
