

INTRODUCING HYGEA DENTAL HYGIENE LASER!

Uniquely for the dental hygienist.

Hygea dental hygiene laser offers the capability to proactively treat the inflammatory components of periodontal disease. Settings for therapeutic pain relief, aphthous ulcer and cold sore treatment, and in-office teeth whitening, expand your abilities and generate additional revenue.

Features:

- 1.5 watt power safely meets parameters for the hygienist's protocols*
- 810nm diode laser optimizes patient comfort
- User interface is streamlined for efficiency
- Eight protocols facilitate hygienist's workflow*
- Pulse mode and Continuous Mode cater to individual preference
- The laser unit can be used in either vertical or horizontal position
- Small footprint takes up little space

*Be sure to check with your local and state dental boards for any guidance and regulations on laser use by Hygienists.
