## Sample Saucey Bar White Widow

Sample ID SD230117-065 (56642)		Matrix Concentrate (Inhalable Cannabis Good)
Tested for Gold Spectrum CBD		
Sampled -	Received Jan 17, 2023	Reported Jan 31, 2023
Analyses executed CANY		

Laboratory note: The estimated concentration of the unknown peak in the sample is 2.87% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)d8-THC or d9-THC. At this time there are no reference standards available for (+)d8-THC, (+)d8-THC is a different compound from the main (-)d8-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)d8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC with the majority, if not all, of the concentration being (+)d8-THC. Total (+/-) D8 Concentration is estimated to be 31.01%

Estimated Total HHCO: 23.52% | Estimated 9R-HHC-O = 14.40% | Estimated total cannabinoids = 79.18%
