

Snake & Spider Safety
Awareness for Employees

A close-up photograph of a snake's head, showing its scales, eye, and open mouth with a pink tongue and fangs. The snake has a pattern of orange and yellow spots on its body.

SNAKE & SPIDER SAFETY AWARENESS

A Seminar for Employees

SNAKE & SPIDER SAFETY AWARENESS

the importance of educating our employees

A snakebite is a medical emergency requiring an immediate response! This initial response is vital and can be the difference between life and death.

The *SSSAFE* program is highly mobile, allowing the seminar to be presented at your venue/s of choice and can be tailored to suit your requirements. It provides expert knowledge in an accessible presentation style, tailored to suit your company needs and to help ensure ALL attendees leave the seminar confident that they can react calmly and correctly if ever they find themselves in a life-threatening situation.

KEY FOCUS AREAS:

- Snake Safety and Emergency Procedures
- How calm effective management of snakebite can prevent an accident from developing into a serious incident!

CRAIG ADAMS

SSSAFE Director and course facilitator, Craig Adams, former Operations Manager of the Australian Reptile Park and their life-saving Venom Program, has over 20 years professional experience working and teaching venomous snake handling and husbandry skills.
