

Yakka (Work) Seated Desk Junior

A hardwearing primary school desk that is joyfully different from the rest. Available in Small for one child, or Large for two children. The junior desks come in year-group sizes, so they are proportionate to a child's stage of development.

The Yakka desks are easy to manoeuvre. The legs on the far side have castors so a child or adult can tilt the desk and wheel into a new position. Within minutes you can switch from individual work, to group work, or whole class activities.

The tops – triangle-shaped for the small and trapezium-shaped for the large – feature a generous corner radius. In a classroom setting they can be arranged in a multitude of configurations, which drives dynamic thinking and self-led learning.

Koskela utilised biophilic design principles, which are based on a connection to nature, to develop the Learn by Koskela range. Our colours are inspired by the Australian landscape.

Where possible we have made natural finishes and materials available, while maintaining affordability. For the Yakka desks, birch laminate is an option for the tops, and a metal/timber combination is an option for the legs.

Yakka translates to *work*, and the word originates from the Yuggera Aboriginal language in Brisbane.

Products have a seven-year warranty plus an extensive post-purchase care & maintenance program.
