

gregory evoke

ergonomic task chair

Elevate your workspace experience with the Gregory Evoke, Australia's superior ergonomic mesh back office chair. Thoughtfully designed and manufactured in Australia, the Evoke represents the future of ergonomic seating, blending cutting-edge technology with a fresh, contemporary mesh back design.

The Evoke features a striking mesh back design, offering optimal breathability while ensuring an aesthetic appeal that complements any modern workspace. The height-adjustable ratchet back and upholstered lumbar support allow you to perfectly tailor the chair's fit to your body, providing unparalleled support and comfort throughout your workday.

Customisable to suit your individual needs, the Evoke offers a small, medium, or large seat. This range ensures a perfect fit for every user, enhancing comfort and promoting proper posture.

At the core of the Evoke's ergonomic design is Gregory's original and award-winning Dual Density Posture Support seat technology. This innovative ergonomic seat technology reduces the muscular effort required to maintain a good posture throughout the day and boosts circulation, enhancing your overall comfort and productivity.

The Evoke comes equipped with a user-friendly 3-lever independent mechanism that allows for easy adjustments of seat height, seat tilt, and back angle, offering a truly personalised seating experience.

Built to last, the Gregory Evoke is AFRDI 142 – Rated Load – 160kg MS Certified, demonstrating its capability to sustain intensive use while maintaining structural integrity and optimal performance.

Experience the fusion of contemporary design, superior comfort, and robust durability with the Gregory Evoke. Elevate your workday, choose Evoke.
