Extra Small

480w

gregory petite

ergonomic task chair

Presenting the Gregory Petite chair, a revolutionary ergonomic seating solution thoughtfully designed and manufactured in Australia. Tailored to those seeking a smaller seat size without compromising on comfort or quality, the Petite combines Gregory's expertise in ergonomic design with a fresh and compact profile.

The Petite features an extra small seat depth of 380mm from the lumbar support, and an overall seat depth of 420mm. This unique design ensures maximum comfort while providing the perfect fit for individuals who prefer a more petite seating solution.

Choose from either a medium or high back, and further tailor your choice with the Inca (round) or Boxta (square) back design. These options allow you to customise the Petite to your aesthetic preference and ergonomic needs, creating a chair that is as unique as you are.

Equipped with a user-friendly 3-lever independent mechanism, the Petite allows you to easily adjust the seat height, seat tilt, and back angle, providing a personalised seating experience that supports your posture throughout the workday.

The Petite's back outer is crafted from durable molded polypropylene, and the chair features an anti-slip ratchet back height adjustment, ensuring your chair stays precisely in your desired position.

The Gregory Petite chair – a smaller seat that delivers big on comfort, style, and ergonomics. Choose Petite for a personalised, high-quality seating solution designed with your comfort in mind.
